

CORRECT TREATMENT PLANNING

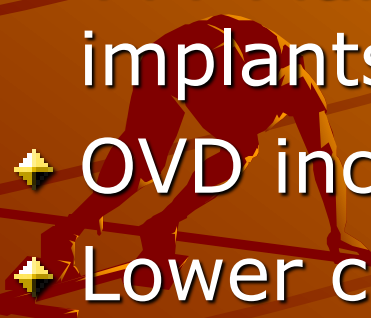

Altering OVD Provisionally with
base metal onlays. A clinical
report

Prasad et al. JPD 2008

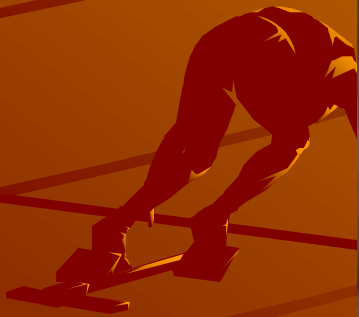

Proper treatment planning can
achieve miracles

- 
- ◆ 73 year old male patient
 - ◆ Severely worn down teeth
 - ◆ Patient wants better esthetics and function
 - ◆ TTT Plan: full mouth CM resorations and implants in the edentulous area
 - ◆ OVD increased by 3mm
 - ◆ Lower centrals extracted
 - ◆ Segmented resorations
